

ORAL HEALTH SERVICES FOR AGED CARE RESIDENTS

*Dedicated to improving the patient comfort and confidence,
conveniently at their place of residence.*

About Us

Dental Care Australia (DCA) has long been operating as a dental clinic caring for patients in Sydney, in addition to offering mobile care to patients in metropolitan, regional and remote locations around NSW. Working on projects with NSW Health to reduce public health waiting lists for dental care, our team is eager to assist more sectors to receive the attention they deserve.

Recently, DCA had the opportunity to expand on its mobile capabilities and increase its network of experienced clinicians. We are pleased to announce the acquisition of Advance Oral, a mobile oral care and specialist denture services provider to aged care facilities. We can now deliver a more comprehensive solution, providing oral assessments, cleaning of natural teeth and dentures, repairs, name identification and replacement denture services, plus fillings and dental recommendations for natural teeth.

Our Services

Our oral assessment services are provided across the entire facility (seeing all residents for whom signed consent has been received) or can be requested for individuals on an 'as needed' basis. We welcome families to be present during appointments so they can understand the needs of the patient and ask any questions they may have of the clinician.

Denture services, including repairs and relines or provision of new partial or full dentures, can be requested individually, or may be recommended in the written oral assessment report. Residents requiring dentures can benefit from our strong working relationship with Australia's largest and longest operating dental laboratory, enabling the provision of quality dentures, faster and at competitive pricing.

A clean of natural teeth conducted by an Oral Health Therapist, can be requested for an individual at any time by a facility or can result from acceptance of an assessment recommendation. We also offer in-depth training programs to help facility staff with the challenges of providing oral care assistance to residents.

Our services are offered by experienced and dedicated Dental Prosthetists, Oral Health Therapists and Dental Technicians. While we cannot guarantee availability of mobile Dentists, we will endeavour to assist with these arrangements, when possible, through our strong network of partners and external practitioners.

Please see overleaf for a list of services and introductory packages.

*Should you require a tailored solution across multiple locations,
please don't hesitate to contact our team to discuss your requirements.*
